SUMMARY.

Ladies,	336
Gentlemen,	172
Total,	408

BRANCHES TAUGHT--CLASS BOOKS.

PRIMARY DEPARTMENT.

Reading and Elocution.....	<i>Sanders.</i>
Spelling	"
Orthography.....	<i>Sander's Chart.</i>
Pennmanship.....	<i>Knapp & Hightingree.</i>
Geography.....	<i>Colton & Fitch.</i>
Drawing begun	
Primary Arithmetic.....	<i>Stoddard.</i>
Primary Physiology.....	<i>Mrs. Cutler's.</i>
American History (Juvenile).....	<i>Wilson's.</i>

HIGHER DEPARTMENT.

COMMON BRANCHES.

Reading and Elocution	
Orthography.....	<i>Sander's Chart.</i>
Intellectual Arithmetic.....	<i>Stoddard.</i>
Geography and Map Drawing.....	<i>Colton & Fitch.</i>
Practical Arithmetic.....	<i>Stoddard.</i>
English Grammar.....	<i>Clark.</i>
Watts on the Mind	
History, United States.....	<i>Wilson.</i>
Physiology (First Book).....	<i>Cutler.</i>
Familiar Science.....	<i>Peterson.</i>
Science of Government.....	<i>Young.</i>
First Lessons in Composition.....	<i>Quackenbush.</i>

ACADEMIC BRANCHES.

*Natural Philosophy.....	<i>Sprague & Olmstead.</i>
*Anatomy, Physiology and Hygiene.....	<i>Cutler.</i>
Chemistry.....	<i>Youman's & Stockhart.</i>

*The Academic Branches marked with a star, together with all the Common Branches will constitute the Teacher's Course.

Botany.....	Wood.
Geology.....	Hitchcock.
General History.....	Willson.
*Book Keeping (Single Entry).....	Fulton & Eastman.
*Algebra (Elementary).....	Devy & Loomis.
*Astronomy.....	Robinson.
*Chronology, Ben's System.....	Proctor.
*Theory and Practice of Teaching.....	Page.
Ancient Geography.....	
Philosophical Arithmetic.....	Stoddard.

COLLEGE BRANCHES—HIGHER MATHEMATICS &c.

Latin.....	Bullian's Series.
Greek.....	"
French.....	Pasquell's Course.
German.....	Woodbury's.
Spanish and Italian.....	
Higher Algebra.....	Loomis'.
Geometry.....	Davis' Legendre.
Trigonometry.....	"
Surveying and Mensuration.....	Davis'.
Analytic and Descriptive Geometry and Calculus.....	Loomis'.
Book Keeping, (Double Entry).....	Fulton & Eastman.
Logic.....	Hodge.
Mental Philosophy.....	Alexander's.
Moral Philosophy.....	Wayland.
Advanced course of Composition and Rhetoric.....	Quackenbush.
Political Economy.....	Wayland.
Butler's Analogy.....	
Natural Theology.....	Polcy.
Evidences of Christianity.....	"
Elements of Criticism.....	Kane.
Zoology.....	Agassiz.

*The Academic Branches marked with an asterisk, together with all the Common Branches will conform to the Trustees' Order.

CIRCULAR.

MT. CARROLL SEMINARY.

LOCATION AND ACCESS.

The location of this Seminary in the village of Mt. Carroll, Carroll Co., Ill., is one of the most desirable in the West. Its proximity of climate makes it especially well adapted as a resort for those not enjoying the most healthy and pure air. The peculiar advantage of its location is that the students, when away from home, are in the center of the village, and therefore, have no need of any other means of conveyance. It can hardly be surpassed by any other school. It has direct and daily communication with Chicago, "via" Freeport, also with Galena, Dixon and important cities on the Mississippi. The River and Mississippi Railroad, which will be completed by early next, passing through the town, will afford additional facility of access to the school.

GROUNDS AND BUILDINGS.

The ground contains five acres, and are being laid out into Gardens, Walks, Park and Play grounds, as an incentive to the health and recreation.

The location of the building is beautiful, on an eminence overlooking the village and a splendid region of country. The building is new, embracing teaching department for the Ladies, and School House for both Ladies and Gentlemen, under the same roof. The building is furnished throughout with furniture of the most approved and genteel style.

TEACHERS.

The qualifications, experience and success of the teachers employed, have earned for themselves and the School a high reputation, and their successful success of the Institution, rapid increase of numbers, the increasing evidence of its patrons are sufficient comment upon their ability to conduct a school of this kind in the West.

It will be the aim of the proprietors of the Institution to furnish every facility for a thorough and finished education to those who favor them with their patronage.

GRADUATING COURSE.

As we claim the female to be capable of the same education as the male and that there is equal demand for it, the same curriculum will be prescribed for both. Young ladies will have the opportunity of pursuing not only the popular and ornamental, but also the substantial and useful branches of Education. Their minds will be trained to vigorous thought, enlarged views and personal efficiency, instead of that constraining, tramping and enervating process that is now the lot of our schools of mere sentiment and fashion.

Those possessed of a good natural talent, and able to sustain a satisfactory examination in the Common, Academic and College Branches, (excepting Italian and Spanish,) will receive a Diploma.

The time devoted to each study is not specified, as students will be advanced from class to class according to their progress, and not according to the time spent in the Institution. About four years will be required for the course. About one year for the common branches, one year for the academic, and two years for the college branches. If ornamental branches

TERMS AND VACATIONS

The year is divided into three terms:

PALL TERM,	Comencing Sept. 25, ending Dec. 24th.
------------	--

ending Dec. 2001

WINTER TERM. } Commencing Jan. 2d
 } Ending April 12th.

Loading April 12th.

SPRING TERM, } Commencing April 21st,
} Ending July 28th.

Enduring July ISBN

There will be a meeting of our youth leaders (Minors) just New Year's, and at our youth picnic (the Florida and Spring term). The next meeting, according to the calendar, is on July 14, 1934.

Break, Lodging, Laundry and Room Included. Fuel except for clothing. Dinner, per week.

TERMS OF ADMISSION.

Terms of admission are a good moral character, and a promise to keep the regulations of the Institution. Students are expected to begin with the quarter and continue till its close. The first about 300 establishments to commence with their class and receive the full advantage of the school; but those entering after the quarter has commenced will be charged only from the date of entry. No exceptions will be made as to late bills for boarding before the close of the quarter, unless previous notice is given by the Principals of such intention, or in case of protracted illness.

BOOKS AND STATIONERY.

The necessary books and stationery will be furnished by the Institution at the lowest cash price. Much assistance is sometimes afforded to teachers and students by a moral influence in the delivery of the same work; by purchasing their books here this inconvenience will be avoided. It is desirable that book and stationery bills should be paid as the articles are procured; although when desired they will be charged.

LIBRARY AND APPARATUS.

A library of readable scientific and miscellaneous works has been presented, in answer to liberal donations from a few individuals, the Institution having as yet no fund for this purpose. Additions will constantly be made to this valuable library for the student. The donation of books is warmly solicited. They may be forwarded to the Principals.

A good Chemical Apparatus is owned by the Institution. The instruction in this department will be so conducted as to afford an ample and practical knowledge of the limits of applying the science to husbandry and the mechanic arts, &c. Chemical Charts and Maps afford additional facilities to the student. An Elementary Chart is on file in this department. Anatomical Charts are also provided, which, together with a course of Lectures expected during the Winter Term from one of the best lecturers in the West, showing to the student of a model of the human figure, all the various muscles, vessels and organs of the body, &c., afford ample facility for the study of Physiology.

MERIT ROLL.

A daily record will be made of the attendance, conduct and recitations of each student, each teacher keeping a separate account for every class teaching in him. These will be handed to the Principals weekly, when a summary of these class papers will be recorded in a permanent book, by which the standing of a student at any time, and rank at graduation can be easily ascertained. This book will be open to the examination of parents, and if students are dissatisfied in their conduct or attendance, it will be seen. Parents who do not have an opportunity to visit themselves with regard to their sons and daughters by visiting the Institution, can have a report filled out and sent them by mail, quarterly, monthly, or at an office as they may request of the Principals.

GOVERNMENT

There will be taken that the discipline be kind and affectionate, but decisive, with a special regard to justice, and every instrument held out to prompt the pupils to practice self-government, and act from moral principle rather than from fear or indifference. The comfort, health, manners and morals of abiding the Institution will be regarded with parental solicitude and all possible care for physical and moral security will be constantly exerted.

BOARD.

It is intended that the board shall be decidedly superior to that afforded by other boarding schools, thus securing the reputation often and in many cases too justly connected with them. The lady, Mrs. Holmes, who has the special care of the boarding department,

a lady well qualified for the station, possessing a peculiar facility for securing to the young artist that useful home training which is so desirable and essential, to insure a proper development of talent. Young ladies who wish to spend the vacation at the Institution, will receive the same care and attention as during the school session, and may, if desired, continue to receive instruction in Music and the Languages.

Giftedness can never be lost. In excellent private families at reasonable prices.

Many new facilities are being secured to the vicinity of the Seminary, which will afford important facilities for students to secure rooms at board in private families.

No student from abroad will be admitted as a member of this Institution who is not subject to the control of the Principals and of school laws, for the reason, that if they are not subject to such restraining influences, they bring with them habits of walking, speaking and deportments which may be very disadvantageous to the Seminary school laws.

MISCELLANEOUS INFORMATION.

THE SABBATH.

It is not a rule or law, that every pupil shall attend church twice on the Sabbath, yet it is the request of the Principals, that they should do so, and also attend Sabbath School or Bible Class, and very seldom is a pupil found to pursue a course contrary to the known wish of a respected teacher. Parents are requested to name their choice of a place of worship; religious preferences are held inviolable. Those truths which should ever govern the moral being, will be faithfully inculcated without any Sectarian prejudice or bias. *No visiting or receiving visits on the Sabbath, will be tolerated, except in cases of necessity.*

CORRESPONDENCE.

An extensive trifling correspondence, is highly pernicious to pupils, and should not be allowed. It is hoped parents will communicate their wishes in this matter, to the Principals. Should pupils, in their correspondence with parents, express dissatisfaction or complain of the rules of School or anything pertaining thereto, the Principals "earnestly urge the propriety and justice of parents informing them without delay, in order that the wrong, if there be any, may be searched out and removed." There is no need of anonymous communications or individual deputies being employed to adjust little misunderstandings, but a prompt, frank address to the Principals from the person or persons immediately concerned, will receive that attention the importance of the case may demand.

MUSIC & LANGUAGES.

Having engaged the services of an accomplished foreign pianist and linguist, our advantages in Instrumental and Vocal Music, and the Languages are not surpassed by any institution in the country.

EXAMINATION

The annual examination of all the classes will occur at the close of the winter term in February. Parents and guardians are earnestly invited to attend. A committee of competent persons, not less than five, will be appointed to attend the examination and report its character, &c.

BOARDING SCHOLARS.

Boarders will furnish their own towels, lights and brooms for their private rooms.

The study tables for evening, are lighted by large globe lamps.—The halls and music room are also lighted by lamps, and thus all necessity for carrying lights about the building is obviated. As boarders are to furnish their own lights, the expense of lamp light for the study tables is apportioned among those occupying them, and is found by experience to be much cheaper to the Students than candles or any other light, at the same time it is *decidedly the best*. No Student is allowed to use camphine or burning fluid.

Every article of clothing should be distinctly and fully marked with the owner's name, and it is particularly desired that all students should remember overshoes in their outfit.

If parents desire that articles of clothing, books or stationary be furnished, funds for that purpose should be deposited with the Principals, as also all spending money for the use of minors. *Pupils need but very little, if any, pocket money.*

A high standard of punctuality must be aimed at by all connected with the institution. A pupil cannot lose a single lesson or study hour with impunity, hence it will not be allowed save in cases of necessity.

Parents who apply to have their children received into the Seminary, should give their names, ages, and the studies they will probably pursue. All applications should be addressed to the Principals.

Students will bring the text books they have been in the habit of using, with them.

REGULATIONS.

1. Pupils will rise in the morning at the ringing of the bell, and retire by ten in the evening, and have their lights extinguished.

2. All injury done to the Seminary rooms or buildings or to any property connected with the same, shall be repaired at the expense of the student committing it. If the particular author or authors of the injury be unknown, the expense shall be apportioned among the whole number of students in any way implicated.

3. Every student shall observe *order and neatness* in the school rooms and private rooms, and any glaring violation of this rule may be reckoned and charged as damage.

4. No person shall visit the kitchen without permission.

RECOMMENDATIONS.

The following is an extract from a letter written by N. W. EDWARDS, State Superintendent of Public Instruction, after his return from a visit to this school in October last:

"I concur in the opinion expressed by the Trustees of the Mount Carroll Seminary, that the location of this Institution is one of the most desirable in the West. The location of the building is on an eminence overlooking the village, and one of the most beautiful prairies of the West on the one side, and the finest scenery on the other. The arrangement of the rooms, furniture and apparatus will compare with any other institution in the West. Their system of instruction is such as will train the mind to process of thought and investigation. The Teachers are well qualified to take charge of a Seminary of the highest grade, having received a finished education in the State Normal School of New York, where they have been thoroughly educated and drilled in the art and practice of teaching. Their experience and success have since earned for them a deservedly high reputation. * * * I saw enough during my short visit to the institution, to satisfy me that your citizens have been fortunate in securing one of the best Institutions of Learning in the country. I know of no place I could recommend more highly.

"We found the teachers very agreeable, courteous and affable, as well as intelligent, energetic and talented. The building is certainly very neatly and tastefully arranged. The rooms are judiciously constructed as to size, ingress and egress, ventilation, comfort, convenience, etc., while the taste and elegance of the furniture and fixtures, the air of bewitching attractiveness that prevails, is quite equal to sickening an editor of his dingy office. The apparatus of the Institution is more complete than any we have seen in the West, and a good deal of attention is given to the practical demonstration of physical science. The grounds are being rapidly improved by the setting out of fruit and shade trees and shrubbery within the enclosed square.
—*Carroll County Republican*.

The following extracts are from a report of a member of the Examining Committee:

"A commanding, controlling influence is maintained by the teachers. The results are cheerful obedience, faithful work and perfect order. We have never witnessed a more perfect harmony of wills and efforts. There is about the school no ordinary amount of what we call *"snap."* Everything moves on with energy and spirit, somewhat uncommon in schools of the kind. Any display of *vim* and *push* on the part of young ladies is too often checked as unbecoming. Not so here. Languid airs, tender faintness, weakness of lungs,—all the popular feminine *affectations* are at a large discount in the school.

"This school happily combines the practical and the artistic. The teachers labor to induce practical habits of thought and common sense views of life; while neither womanly grace, nor womanly gen-

ness are sacrificed. These latter characteristics belong to woman, but their possession does not require their transformation into rose buds and tulips, repression, as masculine, of every indication of good sense, until every action and utterance forcibly reminds one of Sydney Smith's remark of

"Dying of a Rose in aromatic pain."

We were pleased to find them studying Book Keeping and Chemistry, in its *practical* relations. The experiments of Mr. THOMAS—late a pupil of Prof. YORRANS, can but be profitable to the school.

"Parents who may send their daughters to this Institution may rely on their acquiring cultivated manners and close habits of thought, without subsiding into lisping, limping feminines of the *honey-suckle* order.

Parents and Teachers have a just cause of pride in the attainments of a majority of these pupils. They have evidently made a business of study. Those who sent them may take courage from the result of the examination. If the list were not too long we might mention some who promise much nobleness and usefulness."

NEW ARRANGEMENT.—Many of our readers are aware that an arrangement has lately been consummated, putting this institution fully under control of the excellent Principals. The object sought in this change of control, is the securing of greater vigor and effectiveness to the school, by leaving those fully qualified to conduct it entirely untrammelled in their action. A Deed of Trust has been executed to Misses Wood & Gregory, by the conditions of which they hold the property of the Seminary for ten years, for *school purposes*, at the end of which time the trustees have a power of redemption. As was anticipated, Misses Wood & Gregory have already commenced important improvements on the Seminary grounds, and are making arrangements to economize in the expenses of the school without decreasing in any degree either its interest or value. On the contrary the school cannot but grow better, as they are continually accumulating apparatus, and every day adds to the stock of their experience and the ripeness of their scholarship.—*Republican*.
